TECHNICAL SKILLS

Programming Languages	C#, JavaScript (TypeScript), Python, C, C++
AI Tools & Technologies	GitHub Copilot, ChatGPT, AI Prompt Engineering, Google Gemini AI
Frameworks	ASP.NET Core, ASP.NET MVC, Blazor, NodeJS (NestJS)
Architectures/Patterns	CQRS, Domain Driven Design, Microservices, Client-Server, Event-Driven, Serverless
Databases	MSSQL (Proficient), MongoDB, MySQL, DynamoDB, Azure Cosmos DB, SQLite
Cloud Platforms	AWS (IAM, EC2, Lambda, S3, SNS, SQS), Azure (VM, AD, DevOps, App Services)
DevOps & Tools	Git, Azure DevOps, TFS, Docker, Jenkins, IIS, Jira
Front-End Technologies	React, Angular, Electron JS, Redux, Bootstrap
Other Skills	Entity Framework Core, REST, LINQ, NUnit, xUnit
Agile Methodologies	Scrum, Kanban

PROFESSIONAL SUMMARY

Senior .NET Developer and AI Innovator with 6+ years of experience delivering scalable enterprise applications. Proficient in **ASP.NET Core**, Entity Framework, and MSSQL, with emerging expertise in AI integration as a productivity tool. Adept at full stack development, mentoring developers, and driving digital transformations through both traditional and AI-powered solutions. Passionate about building cutting-edge, user-centric, robust software solutions for dynamic industries.

WORK EXPERIENCE

Principal Software Engineer | BJIT (Dhaka, Bangladesh)

September 2023 – Present

C#, ASP.NET Core, Entity Framework, MSSQL, TypeScript, React, WinForms, Azure, Docker

- Leading the development of FEIM, an asset management system enabling maintainers of the assets to handle asset's physical state, acquisition information, pricing, repairing, and configuring maintenance workflow for engineers.
- Customizing and maintaining MyHome, a property portal featuring thousands of houses and properties to rent, parking, amenities booking with custom service management for users (service requestors) and property administrators.
- Maintaining IMPORTs, an enterprise property and project management system providing comprehensive CRUD operations, Excel import processing, and role-based access control across multiple entities (projects, properties, tenants, contracts, parking)..
- Mentoring developers, designing and implementing scalable software architecture patterns, enhancing system reliability, and supporting seamless global deployments.

MyHome (Senior Developer)

myhome-aspire.proexcel.com.ph

- A service maintenance system for residents featuring thousands of houses and properties to rent, parking, amenities booking with custom service management.

FEIM (Senior Developer)

- An asset management system enabling maintainers of the assets to handle asset's physical state, acquisition information, pricing, repairing, and configuring maintenance workflow for engineers. It is still under development.

NRW (Senior Developer)

nrw.cwasabd.org

- A service maintenance system for residents featuring thousands of houses and properties to rent, parking, amenities booking with custom service management.

BIS (Senior Developer)

- Bridge Inspection System, a windows application that runs on tablets of the engineers, managing faults of bridges with captured images with detailed information of the inspection.

Software Engineer | KAZ Software (Dhaka, Bangladesh)

January 2020 – August 2023

C#, ASP.NET Core, MSSQL, NoSQL, TypeScript, Angular, React, Node.js, AWS

- Designed and developed scalable web applications deployed on AWS and Azure, cutting operational costs by 25% and improving system reliability.
- Modernized legacy software projects, enhancing application performance with ASP.NET Core and Docker
- Optimized APIs for millions of users with load-balanced API Gateways, reducing downtime and automating deployments.
- Managed and mentored subordinates, reviewed code through Agile practices and technical guidance.

Reganalytics (Developer)

reganalytics.com

- A compliance platform providing real-time updates on global trade regulations, upgraded technology and framework for performance improvement of the application.

WebEvv (Developer)

webevv.com

- A cloud-based EVV platform with real-time tracking and automated workflows, enhancing operational efficiency for care providers.

Devensoft (Software Engineer)

devensoft.com

- A merger and acquisition platform, serving millions of users with seamless and reliable services.

P1ston (Software Engineer)

p1ston.com

- A supply chain workflow solution. The scalable ERP module enabling automated purchase order management, real-time supplier coordination, and complete supply chain traceability.

Internship Trainee | Brainstation-23 (Dhaka, Bangladesh)

January 2019 – June 2019

C#, JavaScript, ElectronJs, AngularJs

- Learned, built and maintained features for desktop and web applications, focusing on gaining hands on experience in real life software solutions.
- Collaborated with senior engineers to build scalable solutions for real-time activity monitoring at computer devices.

Intellifriend (Trainee Software Engineer)

- Built a real-time activity monitoring system, track user's activity at computer device (Windows, Linux, Mac) and analyze the data to generate comprehensive productivity data of employees.

CERTIFICATION

- **AWS Certified:** AWS Certified Cloud Practitioner

[Certificate Link](#)

PUBLICATION

- **Conference Paper:** Analyzing Golang Projects' Architecture Using Code Metrics and Code Smell
- **Date:** 26 June, 2021

[Paper Link](#)

ACHIEVEMENT

- **Career achievement:** Best Performer Award at BJIT
- **Fisc. Year:** 2024-25

[Certificate Link](#)

Personal PROJECT

- **LithiumGit:**

lithiumgit.com

LithiumGit is a clean, fast Git client that makes every day version-control tasks simple and visual. Use the interactive graph to understand history at a glance, inspect any commit, and perform actions like merge, rebase, cherry-pick, and branch creation in context. It's origin-independent—works with repositories from GitHub, GitLab, Bitbucket, Gerrit, or

any other Git remote—and it relies on the Git you already have installed on your PC. No registration or sign-in required.
Free and open source.
Role: Author & Developer

EDUCATION

Bachelor of Science in Software Engineering	2015 – 2019
University of Dhaka Dhaka, Bangladesh	https://du.ac.bd

ADDITIONAL DETAILS

▪ English Proficiency:	Medium Fluent
▪ Native Language:	Bengali
